Summary

Experienced and diligent Frontend Developer adept at optimizing and refactoring applications to enhance speed and performance. Successfully developed a dynamic chat application within a month, demonstrating strong problem-solving skills and a commitment to delivering efficient solutions.

Skilled in identifying and addressing bottlenecks to ensure smooth user experiences. Leveraged personalized mentorship during academic pursuits to accelerate learning and improve coding standards through comprehensive code reviews.

Skills

- **Programming Languages:** HTML5/CSS3 (SASS), JavaScript, TypeScript
- **Technologies/Frameworks:** Angular 2+, RxJs, NgRx, Git, Jest, Jasmine, Webpack, React, RESTful, Redux
- **Developer Tools:** VS Code, Figma, Zeplin, Postman
- **Project Management:** AGILE, JIRA, GitHub
- **Languages:** English – B1+, Ukrainian – Native, Russian – Fluent
- **Soft:** Teamwork, Communication, Problem-solving, Flexibility, Motivation, Responsibility

Experience

Connections Project | *Angular, TypeScript, HTML, SCSS, RxJS, NgRx, Angular Material*

- Developed a dynamic Angular chat application facilitating public group discussions and private one-on-one conversations.
- Implemented features like authentication, user page, public groups and users lists.
- Enabled the creation of groups or conversations with dedicated pages for viewing and sending messages.

ECommerce-Application | *React, TypeScript, JavaScript, HTML, CSS, WebPack, Matetial UI, Commercetools*

- Collaborated with a 3-person team to develop a web shop, facilitating users in choosing their preferred clothing items and proceeding to checkout.
- Implemented an agile workflow, taking charge of team coordination and control. Utilized CommerceTools platform to enhance the functionality and performance of the application.
- Successfully integrated features such as filtering/sorting, authentication, and product pages.

Education

National Aviation University | *Computer Science*

Kyiv | 09.2020 – Present
